

SEATING

Ease Lounger

Innovation Meets Outdoors. Born from the need to enhance outdoor environments with innovative, contemporary, + simple design, the Ease Lounger is stunning. The surface dedicated to relaxation is clean + well-balanced. A mixture of steel, aluminum, + technopolymer results in a lightweight, manageable product that is extremely durable. This stackable lounger has a backrest that is adjustable to 5 positions + practical hidden casters for easy transport. The slats of the relaxation surface lend breathability to the chair and allow moisture + water to escape, avoiding stagnant deposits. The material is resistant to salt, UV rays, atmospheric agents, + pool chlorine.
